The wise man took out a piece of paper and drew a straight line down the middle. He explained that

he would write down the things Peter had lost on the left side and the things Peter still had on the right side.

The wise man asked, "When did your family leave you?"

"What do you mean? They haven't left me. They love me!"

"That's great!" said the wise man. "Then that will be the first thing on the right side — Family haven't left. Now, do you have freedom (自由)?"

"That's a silly question. Of course I do!"

"Good! That's the second one on the right side — You have freedom!" said the wise man, writing it down.

After Peter was asked some more questions in the same way, he finally understood and smiled.

"Things will change when you think of them in a different way!" he said.

As a matter of fact, change your attitude and you will change your world. It's necessary to have a positive (积极的) attitude to life.

Do you often run outdoors to keep healthy? Have you ever thought about how running helps to clean up the earth? Sometimes a creative mind can bring us a win-win (双赢) situation.

Plogging, a new way to exercise, began in Sweden (瑞典). The name "plogging" comes from two words—the Swedish (瑞典的) word "plocka", which means "to pick up (捡起)", and the word "jogging", which means "to run slowly". A Swedish man called Erik started the movement. He saw rubbish here and there when riding to work each day. He became worried about the dirty environment and decided not to go to work by bike any more. Instead, he began to run to work and pick up the rubbish at the same time. To his joy, more and more people followed him and soon plogging became popular.

Many people choose plogging instead of just jogging because they think plogging is a good way to help clean up the earth. Sometimes rubbish is difficult to collect because it may **scatter** all around. But if the runners pick up the rubbish on the way, it is quite different. After all, many hands make light work. Another reason is that plogging burns more calories (卡路里). According to a research, plogging for 10

(A)

to my surprise, dress, he, second, make, neighbor, beauty, wind

It was early morning. I got 61 quickly. It was still autumn but colder than usual. It snowed for 62 days. I forgot to check the weather report today, so I went out in a jacket.

It was still dark, cold and 63. At that time, I knew I 64 a wrong decision. I shook a little bit. Suddenly, a car stopped and one of my 65 got out of it. We greeted each other and talked about the bad weather. 66, he took off his coat and handed it to me. He smiled and said, "It's too cold. Put it on." Looking at the warm coat in my hands, I was touched and thanked 67. After that, he drove away. When I looked up at the sky, I noticed the sky was 68 and peaceful. I felt warmth inside me and I didn't shake any more.

The world is full of kindness. Love is always there.

(B)

Dinosaurs(恐龙) once lived on the earth for a long time. They suddenly disappeared millions of years ago. What happened to them? That's still a mystery. People never stop searching for the answer.

Some US scientists say it is because there were not enough male (雄性的) dinosaurs. They got this

idea after researching crocodiles (鳄鱼).

Mother crocodiles lay eggs and later baby crocodiles come out. The local temperature decides the sex (性别) of the baby crocodile. When the eggs are at a temperature of 26 °C to 30 °C, the babies are all girls; when the temperature is 30 °C to 34 °C, there are both boys and girls; when it is 34 °C to 36 °C, only boys are born.

Dinosaurs' babies also came from eggs. So scientists have given us a new picture: millions of years ago, it suddenly became very cold. Almost all dinosaur babies were girls. There were fewer and fewer male dinosaurs. Mother dinosaurs could not give birth to more babies. Finally, these powerful animals disappeared.

(C)

Leonardo da Vinci (莱奥纳多·达·芬奇) was a famous artist who was born in Italy. He was also a great inventor. Many of his inventions have become important in modern life. Although Leonardo hated war, he invented many different machines used for war. His most special invention was the machine gun, which was produced and used in war. Besides, Leonardo spent days thinking about how to save time. He developed ideas for something like cutting machines.

Leonardo was a strange man. He never ate meat. That was very unusual in those times (时代). He never published (发表) scientific discoveries. He usually used mirror writing, which looks like usual writing in a mirror, starting from the right side of the page and moving to the left side.

Only a few of his paintings are left today. Many paintings were not finished because he thought they were not perfect.

Leonardo was talented and creative. He was regarded as one of the most intelligent men in the world.
