American schools are quite different from those in China. In America, at the beginning of the term, students must select (挑选) their subjects and teachers first.

Selecting is very important for your marks in America. So at the first term, don't select too many subjects, or you'll feel very nervous and tired. Then you have to ask for some teaching plans. There is some information about subjects, time arranging, marks and textbooks. At the same time, you must choose the teachers. Different teachers have different teaching methods. If the teacher is called "killer" by the last grade, many students will give up choosing him, because this kind of teacher will leave too much homework, too many exams and give too low grades. There is another thing after you select the subjects and teachers. How to buy textbooks makes each student feel hard. The textbooks in America are very expensive. Each one is about \$30-50. In order to save money, many students buy some used textbooks, and some students usually borrow textbooks from the school library.

In class, discussing is very important. The teacher encourages you to ask questions or show your own opinions. They don't usually ask you to sit well. Instead they allow you to sit or stand anywhere you like.

One possible version:

Today, more and more students are using the APP *zuoyebang*. Different people have different ideas about it. Some people think it's useful. The APP *zuoyebang* can help students to solve difficulties in their studying in time. It's easy and convenient for them. They can study at home. They can choose their own teachers they like, and they will be more interested in studying.

However, others don't think so. They think some students just pretend to study, in fact they play games. They don't want to think independently, but only copy the answers. They don't care about their studying at all. It's a waste of time.

I think it's good for students who are hard-working. They can study better. But for students who don't want to study, it's very bad.
